Regionalism in architecture is about the context and customs of making buildings in a particular region. These buildings, mainly houses, rely on specific knowledge of the climate,

geology, ... Regionalism in Architecture: Definition, Characteristics ... Critical regionalism can be described neither as internationalism nor as an architectural expression of a region's history. It considers specific elements of certain buildings and interprets them from a reflective rather than an obvious point of view (Frampton, 2004). It pays more attention to a building's meaning than to its atmosphere, and the atmosphere would be appropriate if the architect's design had been traditional.
