This book examines how the ideas, interests, and biases of international financial institutions, private banks, and the press affect economic and political change during periods of crisis. It suggests that the monetary and financial trials of Argentina then and now serve as a microcosm for the Western world's current backlash against globalization.

An urgent wake-up call—and radical action plan—for business leaders everywhere. While it focuses primarily on Canadian business, this important book shares valuable insights of benefit to transformational business leaders everywhere. Without sugar coating his message, author R. Douglas Williamson, head of the prestigious consultancy, The Beacon Group, points to complacency, lack of leadership sophistication, and an inward focus as the chief reasons why Canadian companies are at risk of falling behind the rest of the world. Issuing an urgent call to action, Williamson helps leaders understand the four principle challenges facing the modern leader and describes the eight essential leadership competencies required to navigate the future. He provides powerful strategies, tools and techniques for how to reframe thinking about leadership and reform leadership strategies. Case Studies from The Beacon Group's wide and diversified client base include The Four

Seasons, Scotiabank, Nortel Networks, Research in Motion, The Hudson's Bay Company, Export Development Canada, Holt Renfrew, and many others. "Gaming the LIBOR—that is, fixing the price of money—had become just that: a game. Playing it was the price of admission to a club of men who socialized together, skied in Europe courtesy of brokers and expense accounts, and reaped million-dollar bonuses." In the midst of the financial crisis of 2008, rumors swirled that a sinister scandal was brewing deep in the heart of London. Some suspected that behind closed doors, a group of chummy young bankers had been cheating the system through interest rate machinations. But with most eyes

focused on the crisis rippling through Wall Street and the rest of the world, the story remained an "open secret" among competitors. Soon enough, the scandal became public and dozens of bankers and their bosses were caught red-handed. Several major banks and hedge funds were manipulating and misreporting their daily submission of the London Interbank Offered Rate, better known as the LIBOR. As the main interest rate that pulses through the banking community, the LIBOR was supposed to represent the average rate banks charge each other for loans, effectively setting short-term interest rates around the world for trillions of dollars in financial contracts. But the LIBOR wasn't an average; it was a combination of guesswork and outright lies told by scheming bankers who didn't want to signal to the rest of the market that they were in trouble. The manipulation of the "world's most important number" was even greater than many realized. The bankers kept things looking good for themselves and their pals while the financial crisis raged on. Now Erin Arvedlund, the bestselling author of *Too Good to Be True*, reveals how this global network created and perpetuated a multiyear scam against the financial system. She uncovers how the corrupt practice of altering the key interest rate occurred through an unregulated and informal honor system, in which young masters of the universe played fast and loose, while their more seasoned bosses looked the other way (and would later escape much of the blame). It was a classic private understanding among a small group of competitors—you scratch my back today, I'll scratch yours tomorrow. Arvedlund takes us behind the scenes of elite firms like Barclays Capital, UBS, Rabobank, and Citigroup, and shows how they hurt ordinary investors—from students taking out loans to homeowners paying mortgages to cities like Philadelphia and Oakland. The cost to the victims: as much as \$1 trillion. She also examines the laxity of prominent regulators and central bankers, and exposes the role of key figures such as: Tom Hayes: A senior trader for the Swiss financial giant UBS who worked with traders across eight other banks to influence the yen LIBOR. Bob Diamond: The shrewd multimillionaire American CEO of Barclays Capital, the British bank whose traders have been implicated in the manipulation of the LIBOR. Mervyn King: The governor of the Bank of England, who ignored U.S. Treasury secretary Tim Geithner's repeated recommendations to establish stricter regulations over the

interest rate. Arvedlund pulls back the curtain on one of the great financial scandals of our time, uncovering how millions of ordinary investors around the globe were swindled by the corruption and greed of a few men.

A ball of hot money rolls around the world. It seeks anonymity and political refuge. It dodges taxes and sidesteps currency controls. It rolls through offshore shell companies and secret bank accounts, phoney charities and fraudulent religious foundations. It is kept rolling by white-collar criminals, gun-runners, drug dealers, insurgent groups, scam artists, tax evaders, gold and gem smugglers, and, not least, secret service agents plotting coups and financing revolutions. R.T. Naylor explains the origins of this pool of hot and homeless money, its origins, its uses and abuses, how the world of high finance, corporate and governmental, became hostage to it, and the price the world is paying and will continue to pay until the hostages are released. This book was one of the first, and remains the most comprehensive, to dissect the world of offshore finance, capital flight, money laundering, and tax evasion. Once a subject of concern principally to tax authorities and finance ministries, since the September 11, 2001 hot and homeless money has now become a central preoccupation for police forces and intelligence services around the world.
